

Google Connector

Product Overview

ACCESS YOUR GOOGLE ACCOUNT, DIRECTLY, FROM THE MFP

As a leader in the cloud email service market, Google responds to the increased mobility of today's workforce to quickly retrieve their information when and where it is needed. With Google Connector, Kyocera brings this essential capability to the MFP.

You can browse and preview messages, check your calendar for events, and print emails, attachments, and calendar events for hardcopy reference. You can also, quickly and easily, compose and send emails with scanned file attachments through Gmail, directly from the MFP. Google Connector keeps your workforce mobile by retrieving information from Gmail on the MFP, without the need to log into a separate device.

SEND DOCUMENTS THROUGH GMAIL, DIRECTLY, FROM YOUR MFP

Kyocera is a leader in leveraging new technologies as they relate to its customers' evolving document workflow needs. Google Connector is one more way we are transcending the traditional role of the MFP, to reflect the ability for integrated workflow in the devices and services you use every day.
