AccuSender FAX

Product Overview

ELIMINATE TIME-CONSUMING MANUAL FAXING

Despite the increased use of digital technology, vertical markets, such as healthcare, manufacturing and financial services, are still heavily dependent upon fax technology as part of their processes. KYOCERA's AccuSender Fax is a business application that enables users to send scanned documents as faxes, directly from their KYOCERA MFP.

ACCUSENDER FAX ON YOUR KYOCERA MFP

Through integration with most popular fax servers on the market, users simply scan a hardcopy document or select one from stored archives, configure it as an attachment to an email message, and use the recipient's fax number as the email address. The fax server translates the attachment, which is then processed as an incoming fax by the recipient's fax machine.

AccuSender Fax is a simple, cost-effective way to add increased functionality to your KYOCERA MFP, as well as eliminate the security risks associated with stand-alone fax machines and insecure email communications. AccuSender Fax is a trademark of Kyocera.
