

KYOCERA Net Viewer

Product Overview

THE IT ADMINISTRATOR DASHBOARD

Management is the cornerstone of everyday business. You can successfully manage time sensitive projects, critical objectives, expenditures and people, but what about your devices on the network? With KYOCERA Net Viewer, the IT administrator's job just got a whole lot easier.

KYOCERA Net Viewer is a comprehensive network management tool used to monitor, maintain, and update all output devices, locally and remotely. Through KYOCERA Net Viewer, administrators can simply install and update firmware on all Kyocera connected devices, while easily monitoring printed black/color pages, device configuration, accounting, toner usage, and alerts.

REDUCED TIME FOR DEVICE MANAGEMENT

When people are set-up with account codes, administrators can see a snapshot of user behavior, so device placement can be optimized and proper usage ensured. The time associated with managing your connected devices is greatly reduced.

It's a powerful, easy to use hub for any IT administrator.
